Bright (3.96 GPA) and passionate recent graduate with B.S. in Information Science seeking a position within the web development field. Hoping to use my technical skills in helping create accessible and user friendly websites centered around user needs.

SKILLS

✓ Python	✓ HTML	✓ CSS
✓ User Research	✓ Problem Solving	✓ Team Collaboration

WORK EXPERIENCE

Creative Science, Washington D.C - Strategy Team Intern May 2022 – August 2022

- Conducted an internal project initiative from end-to-end using my UX research skills by interviewing stakeholders and employees in order to develop an onboarding process for new remote hires.
- Analyzed qualitative data in order to develop a prototype onboarding hub using Notion for new remote hires that encompasses their company needs as well as specific team practices.

PROJECTS

Integrated Capstone

- Worked on a team to develop a social media strategy for the Priddy Library at the Universities at Shady Grove geared towards increasing collaboration and engagement with their data visualization and VR lab.

User Centered Design

- Conducted user research on pre-college and college students in order to design an app centered around guidance for the transfer college process.
- Designed wireframes using Figma for a mobile app that helps students manage application requirements, deadlines, and financial aid support.

Object Oriented Programming

- Programmed a script in Python that filters and projects a visualization of specific covid data such as location, vaccinations, and infections in relation to user input.

EDUCATION

Bachelor of Science, Information Science, University of Maryland, College Park, MD May 2023 GPA: 3.96

- Relevant Coursework:** User Centered Design, Design Patient Centered Technology, Data Visualization, Object Oriented Programming, Database Design Modeling
